

InSIGHT

NEXT-GENERATION PROJECT MANAGEMENT

As the clinical research world changes, the pressure on businesses to lead the way in innovation and technical excellence is greater than ever. An increasing amount of data from multiple sources requires management and analysis. With our passion for innovation and our in-depth technological expertise, we turn the latest developments into tailor-made clinical research solutions. We know exactly how to combine tried and tested technologies with the latest innovations so that they complement each other optimally and integrate seamlessly into SCOPE's unified project management system InSIGHT. InSIGHT is a powerful, integrated information platform that consolidates, standardizes and visualizes operational and clinical data to generate a holistic view of all study information through

every project stage. Visibility of all project processes allows us to optimize the clinical study management like never before. InSIGHT serves as Global Contact Database, Document Management System, Global Tracking Platform providing an overview and real-time insights for study status information.

Gain the integration, visibility, control and agility you need to run a superlative clinical research development program with Scope International.

PROJECT MANAGEMENT

Manage all study aspects in one location:

- Manage Study-Specific Configurations
- Document Management System including a customizable Document Template Manager, Document Review Workflows and Document Trackers
- Oversight of Study Data Status via Status Trackers
- Visualization of Study Status based on Key Performance Indicators (KPI's), i.e. Site Status, Subject Recruitment Status, Monitoring Visit Status
- Controlled user access to study and site levels

SPONSOR OVERSIGHT

- Sponsor Documents and Communications (Platform for direct exchange and review of study documents and status reports)
- Reports & Analysis Section (Dashboards) allows instantaneous access to Live study status information
- Review of Protocol Deviations and Monitoring Reports directly in system

INSIGHT – THE BENEFITS

- Web based application & access via secure Internet connection anywhere, anytime
- Access permissions based on user role
- Built-In Audit-trail Functionality
- Ability to react flexibly on business needs
- Empowerment by allowing end-user feedback to be a driver of system further development
- Individualized view of Study Information for stakeholders, anytime, anywhere
- Visualization tools allowing live access to Study Status, Trends, Metrics and Performance Indicators
- Continuous tracking and overview of operational activities and performance
- Provides transparency, facilitates joint-decision making and builds trust
- Promotes team working

„authorization made easy“

NEWS: E-SIGNATURE

Our clinical trial management system InSIGHT now has an electronic signature feature which allows you to sign and authorize study documents more quickly. This new, easy to use feature allows for controlled, accelerated collection of multiple signatures on one document. The E-Signature functionality features an automatic timestamp to ensure accurate signature dates. It is secure and set up to comply with 21 CFR part 11 requirements. With our new E-signature, the burden of handling physical documents is eliminated resulting in a faster, more environmentally friendly process.
